Coimbatore, Tamil Nadu, India | Phone: +91-9629764124 | Email: dhayal1107@gmail.com

GitHub: github.com/Dhayalramesh | LinkedIn: linkedin.com/in/dhayalramesh

B.Tech Graduation Year: 2025

PROFESSIONAL SUMMARY

Data enthusiast with a strong foundation in data analytics, Python, SQL, and data visualization. Completed a 2-month AI Engineer internship at Conzeptt Sparx Private Limited, gained hands-on exposure to real-world ML and analytics projects. Delivered multiple end-to-end analytics projects, including customer churn prediction, e-commerce behavior analysis, and marketing campaign ROI optimization, translated raw data into actionable business recommendations. Currently enrolled in an M.Tech in Data Science and AI at IIIT Dharwad and seeking a Data Analytics Apprenticeship at Google to apply and expand analytical skills.

TECHNICAL SKILLS

- Languages: Python, SQL, R (basic)
- Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- Tools & Platforms: Tableau, Looker Studio, Google Sheets, Google Analytics (basic), Jupyter Notebook, Git
- Databases: PostgreSQL, SQLite, BigQuery (basic)
- Concepts: Data Cleaning, ETL, Exploratory Data Analysis, Statistical Analysis, Predictive Modeling, RFM Analysis, A/B Testing, Dashboard Design, Data Storytelling

PROFESSIONAL EXPERIENCE

AI Engineer Intern | Conzeptt Sparx Private Limited (Remote)

April 2026 – July 2026 | 2 Months

- Built and evaluated machine learning models on client datasets, applying data cleaning, feature engineering, and model validation techniques to improve prediction reliability.
- Analyzed project datasets to surface trends and insights that informed technical recommendations shared with cross-functional stakeholders.
- Partnered with product and engineering teams to translate business requirements into data-driven technical solutions.
- Gained direct exposure to industry workflows, agile project management, and client communication practices.

PROJECTS

Customer Churn Prediction & Retention Strategy

Tech: Python, SQL, Tableau, Scikit-learn, Pandas | GitHub: github.com/Dhayalramesh/churn_analysis

- Analyzed 7,000+ customer records for a telecom company to identify churn drivers and predict at-risk customers.
- Built a Random Forest model achieving 82% accuracy to predict customer churn.
- Identified key churn drivers: month-to-month contracts (42% churn), tenure under 1 year (35% churn), and high monthly charges above \$70.
- Delivered actionable recommendations projected to reduce churn by 40% and recover \$25,000+ in monthly revenue.
- Built an interactive Tableau dashboard for real-time churn monitoring.

E-Commerce Sales & Customer Behavior Analysis

Tech: Python, SQL, Looker Studio, RFM Analysis | GitHub: github.com/Dhayalramesh/E-Commerce-Sales-Customer-Behavior-Analysis

- Analyzed 100,000+ e-commerce transactions to understand customer purchasing patterns and revenue drivers.
- Performed RFM (Recency, Frequency, Monetary) segmentation to identify VIP customers, the top 10% generating 40% of revenue.
- Discovered seasonal trends and product affinities, identifying 15 product bundles for cross-selling.
- Recommended product bundling strategies and targeted marketing campaigns based on findings.

Marketing Campaign Performance & ROI Analysis

Tech: Python, SQL, Google Sheets, Statistical Analysis | GitHub: github.com/Dhayalramesh/marketing-analysis

- Evaluated 5 marketing campaigns across 2,000+ customer records to measure ROI and identify top-performing segments.
- Identified the top-performing campaign, achieving a 15.2% acceptance rate and 245% ROI.
- Recommended budget reallocation from underperforming campaigns, projected to save \$50,000 annually.
- Segmented customers by education and marital status, identifying Graduate + Married as the highest-converting segment.

EDUCATION

M.Tech – Data Science and AI

Indian Institute of Information Technology (IIIT) Dharwad | CGPA: 7.93 | 2025 – 2027 (Pursuing)

B.Tech – AI & Data Science

Sri Eshwar College of Engineering, Coimbatore | CGPA: 6.7 | 2021 – **Graduated 2025**

HSC – ARB International School | Grade: 71% | 2019 – 2021

SSLC – Vivek Vidhya Mandir | Grade: 91% | 2018 – 2019

PUBLICATIONS & ACHIEVEMENTS

- “Quantum Enhanced AI to Predict the Traffic Flow” — 2024 International Conference on Emerging Research in Computational Science (ICERCS), IEEE, 2024.
- “Deepfake Detection for Images Using Inception ResNet V2 Architecture Along With CNN” — 2025 5th International Conference on Emerging Research in Electronics, Computer Science and Technology (ICERECT), IEEE, 2025.
- “Comprehensive Web Vulnerability Assessment Using Open-Source Intelligence Techniques” — 2025 2nd Asia Pacific Conference on Innovation in Technology (APCIT), IEEE, 2025.

ACTIVITIES & INTERESTS

- Football: School team captain; led team to district-level tournaments and represented India (club-level) at the Gothia Cup in Sweden and Denmark.
- Continuous learner with strong interest in exploring new data science techniques and problem-solving.

LANGUAGES

- English – Professional Proficiency | Tamil – Native | Hindi – Conversational
